

We've noticed a great improvement in Samantha's confidence in regards to both her academic life and with her peers. Slumber parties are no longer events she avoids.

A fitting celebration is in the works for a job well done... we've GRADUATED!!!!

Portugal- May 2009

*I used to think that there was something very wrong with me, but now I understand that bedwetting affects people of all ages. I used to be afraid for my friends to spend the night and have them find out that I occasionally wet my bed. I am now more confident because I completed all the steps of the program and succeeded. I went from completely soaking the bed, to large spots, to actually waking before I wet everything, even my underwear☺. Before I did this program, I went to a hypnotist and even used alarms. The ETC program really works!!*

*Samantha (11 yrs) Portugal*
