

June 10, 1984

Dear Barbara,

I can't thank you and the Enuresis Treatment Center enough for all you've done. I truly can not believe I no longer have a bedwetting problem. Before finding out about the Enuresis Treatment Center, I had convinced myself that I would someday just outgrow the problem.

I also owe my mother a warm thanks, because it was she who found out about the center and insisted I give it a try. I was resentful towards the idea because I was sick and tired of going to doctors, clinics, specialists and taking pills, etc., and had convinced myself that your clinic would be no different from the rest of them – unsuccessful. I went though, under protest, and I am now eating those words. I thought for sure I would soon be telling my mother, "See, I told you it wouldn't work, they are just like the rest of them; are you finally satisfied mom?" But, now seeing you did help me overcome my bedwetting problem. I now see how wrong I have been.

I want to thank you for your genuine concern and encouragement that you have shown me. Once again, thank you so much for what you have done and that no other doctor even ever came close to.

Sincerely,

22 year old female
