

"I was 14 years old, and I didn't want to take medication the rest of my life. I found your website and told my parents. We decided to give it a shot. I would have to say that starting was one of the best decisions of my life"

— Sara, age 15
Austin, TX

"I had all but given up, and was sure Claire would still be wetting the bed into adulthood, when I heard a radio interview about the Enuresis Treatment Center. During the first phone consultation, Barbara explained about the sleep disorder. I'm a nurse, so it wasn't foreign to me. With the sleep disorder now gone, our daughter is dreaming and is much more rested, too. Sixth grade has even become easier for her. Thanks for everything!"

— The Billmore Family
South Bend, IN

You Are Wondering If We Can Help?

At the Enuresis Treatment Center, we have been effectively stopping bedwetting for children, teenagers, and adults for **over 40 years**. Our longevity of service is because we tailor or individualize our protocol to meet each patient's needs, and we lead you through the entire process. Why does that matter? It matters because bedwetting is a complicated problem to fix. You've searched for a remedy and tried many things, but there have been many missing pieces to the puzzle all along.

How Will You Benefit?

- **Private Attention** - You will work one-to-one with your personal counselor from the beginning of the program until the end.
- **Consistent Progress** - Your counselor will ensure we meet our ongoing necessary targets.
- **Free from Stress** - You won't have to be concerned about your teenager leaving for college as a bedwetter as many parents have to do.
- **Productive Sleep** - Excellent sleep will be achieved for the first time - sharper focus, more energy, elevated mood, better memory, etc.
- **Availability** - We work around your schedule - days & evenings - worldwide.
- **Results** - We offer a money-back guarantee.

Our Years of Experience Have Shown Us What Is Ineffective to Stop Bedwetting:

Prescription Medication	Generic video instructions
Medical Procedures	Homeopathy
Psychotherapy	Motivational Star Charts
Rewards	Diet Modifications
Acupuncture	Fluid Restriction
Hypnosis	Affirmations Before Bed
Chiropractic Adjustments	Bedwetting alarms and pads purchased online

You Need Our Experts to Succeed

"There is nothing like having your hand held while you go through something challenging. I was thankful Marianne was there for us every step of the way. She gave me her full attention and was reassuring. I knew this was going to work for my son.

I loved that your staff was available to answer a question in between my appointments with Marianne. Even that made a difference.

This was a life changing experience and I am super thankful for all of your knowledge, patience and the help you gave us."

*~The McKinleys
Orange County, CA*

Meet Barbara Moore, our founder. She has been where you are. Frustrated and exhausted by her daughter, Gaile's, bedwetting, she made it her personal mission to find a cure to change Gaile's life.

After years of being misdirected and misinformed, Barbara finally discovered that the primary cause for bedwetting is an inherited gene which produces a deep sleep disorder. With the missing puzzle piece in place, Barbara designed the treatment protocol used to end Gaile's bedwetting, which forever improved her quality of life.

Through research and development, Barbara began to refine and perfect the ETC Sleep Training™ process that we use today. As a result, she and her staff have helped tens of thousands of children, teenagers, and adults around the world.

Above is our team here to serve you, which includes:

Dr. Lyle Danuloff, past president of the Michigan Psychological Association. Dr. Danuloff provides valuable guidance to patients who deal with self-esteem challenges as a result of wetting the bed and feeling different.

Michael Stallsmith, M.A., Psy., is our Director of Treatment. Michael provides continuing education training to his staff, and supervises patient interactions and instructions. He ensures that everything is on track for every family.

Your chosen counselor will be your partner throughout the process. Together you'll eliminate the hardship and stress of the bedwetting problem.

Please visit www.nobedwetting.com to meet our staff members.

Our Critical Factors for Success

PROBLEMATIC SLEEP - THE CORE ISSUE

Dr. Roger Broughton, a neurologist and foremost sleep researcher from McGill University in Montreal, established the connection between bedwetting and what he calls a "non-arousable deep sleep". This was a breakthrough!

The irrefutable accuracy of this scientific study paved the way to establish an effective protocol to target the deep, heavy sleep.

We have replicated our approach for over four decades, and the results we produce validate our success for you.

ETC SLEEP TRAINING™ - ENDING THE CORE ISSUE

You've always suspected that sleep and bedwetting have something to do with one another; you're right!

Our ETC Sleep Training™ protocol develops the required cycles of sleep to create signaling between the brain and bladder. Without this synchronization, bedwetting persists.

To reach the synchronization point, the sleeping brain is triggered to break the existing sleep pattern and develop a new one.

Your program brings a lifetime of benefits - improved sleep and a dry bed. How can it get any better than that?

A PRIVATE COUNSELOR - SPECIALIZING YOUR PROGRAM

Bedwetting is a complicated problem to fix. We have confirmed that the key to success in handling this tough issue is an individualized plan of care, and a partner to develop and facilitate this plan.

With regularly scheduled appointments, you work remotely and closely with your own counselor, and under the watchful eye of our Director of Treatment. You may also meet regularly with your counselor in our center.

Direct communication is THE most important element of our protocol. With our clear-cut path, there's nothing for you to figure out on your own, and you are never alone.

REINFORCEMENT PHASE - VERIFYING 100% DRY NIGHTS

We offer you what no one else can. It's called our Reinforcement Technique™. This was designed with one goal in mind: To verify that the sleep training has taken place, and the new sleep pattern has taken hold. When your counselor has proof of this, it will be clear we have passed the final test, and your treatment is then complete.

Over 40,000 people have come to us for help, and with everything we include in each of our programs, we can guarantee 100% dry nights for life.

OPEN FOR YOU SIX DAYS - WORLDWIDE

We are pleased to offer you real live help six days a week. You have direct access to our friendly staff via telephone, email, and Skype, or you are welcome to visit our center in Farmington Hills, MI

We have found that our patients find comfort in knowing that beyond their regularly scheduled appointments, they can call and have any question answered or any challenge addressed. Our availability makes all the difference!

An In-Depth Look at Our Approach

Sleep Pattern – This is the central focus of our program. If someone is wetting the bed, it indicates that there’s a sleep disorder, which means a disruption to systematic functioning. We offer programs that “train the brain” to get the kind of sleep it needs. When the brain accepts a new pattern of sleep through our multi-phase process, we’ll then begin focusing on the brain-bladder connection.

The Brain-Bladder Connection – The brain and the bladder must communicate in order for someone to wake up dry. However, the automatic connection between the two is disrupted by the unusually deep sleep that each bedwetter has. Through our multi-phase process, you will always see progress: The sleep begins changing, the automatic connection begins strengthening, and you’ll begin experiencing more and more dry nights as we go.

Bladder Development – The bladder tends to lose the capacity to grow or be strong enough because of the involuntarily emptying at night. Also the pelvic floor muscle of the bladder tends to weaken because it’s not being utilized at night. We present all necessary exercises that will ensure the bladder and the muscle are both working properly and effectively.

Additional Symptoms – We also address any daytime challenges such as urgent needs and frequent needs to urinate, and any leaking or accidents. This includes any challenges with encopresis (bowel dysfunction).

Get Started – Schedule Your “First Step Appointment”

During this private one-hour appointment, we begin by asking you questions. As specialists, we need to know symptoms, medical history, bedwetting patterns, daytime issues, and much more. We’ll go into detail about why the bedwetting is happening, and then discuss the protocol needed to specialize your program. We also encourage you to ask questions to help you make the best decision for your child or teen. (Or for yourself) The fee is \$80.00 for this pertinent consultation.

We offer you not only our exemplary services, but also our money-back guarantee...in writing!

We invite you to call us and take the First Step! [248-785-1199](tel:248-785-1199) / [800-379-2331](tel:800-379-2331)

We put an end to bedwetting
with a 97% success rate.

Your success story starts by calling [800-379-2331](tel:800-379-2331).
